

Container with quadrants (Xpx, Ypx)

- I. Top Left Quadrant**
 - Vertical (top): 0px to containerHeight / 2
 - Horizontal (left): From 0px to containerWidth / 2
- II. Top Right Quadrant**
 - Vertical (top): 0px to containerHeight / 2
 - Horizontal (left): From containerWidth / 2 to containerWidth
- III. Bottom Left Quadrant**
 - Vertical (top): containerHeight / 2 to containerHeight
 - Horizontal (left): From 0px to containerWidth / 2
- IV. Bottom Right Quadrant**
 - Vertical (top): containerHeight / 2 to containerHeight
 - Horizontal (left): From containerWidth / 2 to containerWidth

Steps To Place Item

1. Determine width & height of container
2. Display container
3. For each item added
 - Get item values (text, colour, etc)
 - Map colour to a quadrant
 - Calculate position (top & right) using width/ height of container
 - Append the new item to the container
